

## digibeg – Digital Infrastructure for Social Care

More safety and dignity in everyday life – simple, inclusive, empowering.

### The Problem

- Language barriers consume operational time in social care institutions every day
- Communication runs through unstructured channels (WhatsApp, paper, phone calls)
- There is no specialized digital infrastructure for multilingual care environments

### The Solution

digibeg is a **digital coordination and connection layer** that brings together everyone involved in care and daily support – regardless of role or background.

The platform connects clients, relatives, and care providers through:

- Live translation for real care conversations
- Emotional analysis to support sensitive interactions
- Structured dashboard for coordination and documentation

### Target Groups & System Value

Municipalities & Institutions, Care Providers & Welfare Organizations, Families & Relatives, Seniors & People in Need of Support, People with Migration Backgrounds. Volunteers & Community Helpers

### Strategic Value

- Operational transparency + structural efficiency.
- Time savings + reduced coordination costs + higher service quality.
- Reduced overload + improved reliability of informal care networks.
- Higher autonomy + safer daily routines.
- Increased inclusion + reduced miscommunication risk.

### Roadmap

- App Store submission in preparation
- Pilot phase with welfare organizations in Mannheim (e.g., DRK / City of Mannheim / Jobcenter)
- Roll-out to additional institutions, including training & support
- Expansion of the partner network (municipalities, care services, integration offices)

## Business Model

- SaaS license per institution
- Target range: €5,000–€10,000 annual license per location
- Monthly subscription system for users and relatives
- Scalable via cloud-based infrastructure
- Access to funding programs or public institutions

## Currently Open: Pre-Seed Round

### Seeking

- Co-Founder Tech & Data – Full-stack / AI background, cloud scalability
- Co-Founder Care Operations & Product – Care processes, multi-location rollout
- Angel investors with network in impact, care, or municipal sectors
- Strategic sparring partners in SaaS / infrastructure
